BREDO – the Bremerhavener Dock GmbH is one of the leading shipyards for repair and conversion located on the German North Sea coast. Around the clock, 100 BREDO experts and up to 400 employees of BREDO's partners work at the four floating docks and at the repair berths. We also have our specialist teams who can carry out repair work all around the world. The tightly organized project management, the compact yard layout and the network of specialists and partner companies help to make us one of the fastest repair shipyards in Northern Europe. Our own steel- and engine workshops, a 150-t-floating crane and own oil-tank cleaning facility makes us most flexible.

We always have the best team for every job.

Whether regular docking, conversion, lengthening, refit, corrosion protection or world-wide technical support – BREDO

100 employees, of them 10-15 apprentice
