Design Services

InnoShip stands for innovative design in shipbuilding. We offer design concepts especially for passenger liners but also for multi-purpose vessels. In doing so it is important to us to offer solutions to the individual requirements of our customers.

We accompany our customers from the first draft, up to the building of the vessel.

Consulting and Calculation Services

Consulting, design, engineering and working drawings as well as theoretical calculations including stability calculation for all types of ships in the range of ship's hull, machinery, equipment, accomodation etc. and supervision during construction.

Total labour force
