ZF is a worldwide leader supplying systems and components for all types of ships such as motor boats, sail boats, superyachts as well as commercial and government vessels.

The product portfolio includes a comprehensive range of transmissions (reversing, non-reversing and hybrid), propellers, steering systems and CANbus-compatible, electronic control systems, azimuth thrusters, tunnel thrusters and sail drives. The portfolio is subject to continuous development and adjustment to market requirements. Complying with safety standards, economic operation and customer comfort is first priority.

As a continuous innovator, ZF is preparing for the next generation of propulsion and safety systems with intelligent connectivity solutions that will further improve productivity and efficiency for different segments and markets. ZF accepts this challenge and combines mechanics, electronics and digital technologies for marine propulsion systems.
