

GENERAL INFORMATION

ABOUT NEUE JADEWERFT

Founded in 1947, Neue Jadewerft serves NVL Group as a state-of-the-art repair shipyard, specifically designed to handle the full range of repair, refit, overhaul and maintenance of large naval vessels up to 150 metres in length. The shipyard also offers these services for civil ships such as tankers, excavators, container ships, tugboats and more. Neue Jadewerft is located in the deep-water and tide-free Port of Wilhelmshaven. Thanks to this location, the routes from the main trade lanes in the North Sea to the shipyard are some of the shortest in Germany.
