

Cables | Logistics | Worldwide

- böhm Kabel was founded in 1989
- Owner-managed, medium-sized, family-based

- Two logistics centres in Iserlohn, Germany
- Logistics centre in Zwingen, Switzerland

Service | Worldwide

- Fast, reliable delivery & service worldwide
- Products & services from a single source
- Development, planning & realisation of individual logistics concepts
- Cutting every desired length & labeling

- Warehousing of your products
- Professional sales team with technical expertise
- Certificates & international approvals
- Certificate ISO 9001:2015
- Q1-Supplier Deutsche Bahn

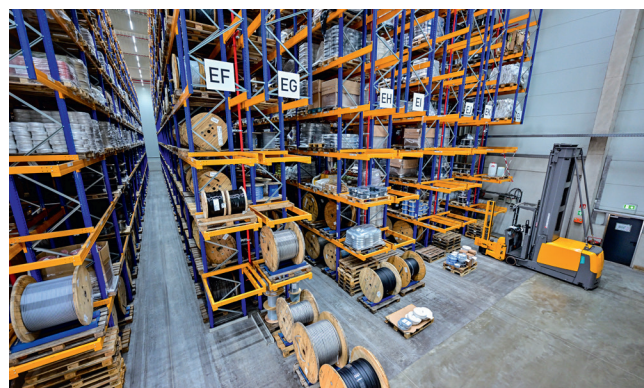

Cables on stock | For various industries

- Marine cables | VG 95218 BAAINBw parts 60-66
German Military | Bundeswehr-Normen
- Shipbuilding industry
- Chemical industry
- Renewabel energy

- Power plants
- Machinery & plant engineering
- Railway technology
- Solar industry
- Fiber optic cables for broadband expansion

Logistics | Our cutting centers

- 4 x Coil winders
- 2 x Drum winders up to 5 tons
- 1 x Drum winders up to 6 tons
- 1 x Drum winder up to 10 tons
- 1 x Semi-automatic drum winder up to 1,5 tons
- Cutting capacity – 1.000 cuts

Marine | Navy | Offshore Cables

Ship-to-Shore | Our eco-friendly solutions

boehm Kabel – Aiming to provide clean energy in ports worldwide.

In order to have clean, emission-free ports, the port authorities started to prohibit the usage of on-board engines and generators which has created a demand for ship-to-shore power solutions. During the process called „cold ironing“, the ship turns off its engines while berthed and plugs into an onshore power source. The ship's power load is then transferred to the shore-side power supply without disrupting on-board services. This is an important step for all of us as it reduces air pollution in and around the port areas.

Our aim is to provide access to clean energy in ports around the world. With our offer of low and medium voltage range, we support environmentally friendly solutions for the ports of the future.
