## Piening Propeller

specialist plant  
for propellers  
and stern gears

Piening-Propellers as parts of Piening propulsion systems are powering a lot of different types of ships worldwide.

Otto Piening as a company can look back on 85 years of a tradition where quality, reliability, flexibility and innovation have always been the main emphasis.

Committed to this reputation, the special plant in Germany actively meets up to challenges of the high-tech era:

With the most modern computer programmes in hydrodynamics, our „Piening-Propellers“ will be designed according to individual preferences and specifications in the area of 3-D.

Piening Propeller is certified by all common classification societies and has the ISO 9001-2008 certificate by GLC.

Luxury yachts for a silence and smooth sailing are powered by „Piening-Propellers“ as well as work ships which are looking for a maximum of efficiency granted by a reliable and service friendly propulsion system.

Piening Propellers scope of supply includes:

- **FPPs (Fixed Pitch Propellers) and CPPs (Controlable Pitch Propellers) from Ø 800 mm upwards**
- **Propeller blades**
- **Shafts up to a several length of 16000 mm and 15t in weight**
- **Stern tubes with sealings and bearings**
- **Brackets (complete)**
- **Rudderstocks**
- **Gearboxes type ZF**

In northern Europe Piening Propeller is well known for its quick repair service on the a.m. products.

Especially for its accurate work on damaged propellers and CPP – blades with a super polishing finish.

With its own foundry Piening Propeller is in the position to deliver new spare blades for CPP in shortest time.

With its long experience Piening Propeller knows that ship owners are always looking for fast, reasonable and durable solutions.
