## **Design Services**

SDC Ship Design & Consult GmbH offers an integrated design concept for all kind of vessels, including gas, chemical and oil tankers, multi-purpose and container vessels, RoRo vessels, cruising and special vessels.

Our step-by-step design service ensures a fast and efficient detailed design phase together with proactive monitoring of the structural design and construction phases.

Our objective is to deliver a design that is complete in itself by the end of the detailed design phase.

We also assist shipping companies by conceptual designs and feasibility studies to assess new opportunities emerging in changing markets.

## **Consulting and calculation Services**

All kind of ship theoretical calculations including stability calculation prior and after delivery of the vessel, e.g. Lightweight survey, draught increase, lengthening, ballast water management, damage control booklets, etc.
