

TAKE PERFORMANCE TO A NEW LEVEL

To compete in today's maritime market, you need the best possible safety, quality, energy efficiency and environmental performance for your global fleet.

Our global team is your ideal partner for all vessel types and offshore structures, including ship newbuildings and vessels in operation, offshore units and installations, certification for materials and components and, last but not least, maritime advisory services. We deliver the unique competence and technological expertise that you can expect from a global player ready to serve all your needs.

DNV GL global services:

- Classification
- Verification
- Technology and innovation
- Operational performance
- Environmental performance
- Safety and risk control
