Commercial Advisory Services

Offshore Wind Power

Pioneering Solutions.

Our services pioneer solutions for the entire range of marine transportation and offshore wind power including

- LNG as fuel – complete solutions
- feasibility studies, market evaluations, operation research
- technical development
- ship design, tendering, evaluation of bids
- ship-to-shore interface coordination
- terminal location selection and jetty design
- marine environmental research
- fleet operation studies
- assistance in time-charter negotiations

- LNG loading and discharge surveys
- vessel inspections
- tendering services
- risk analysis, HAZID, HAZOP, FMEA
- RAM (reliability, accessibility and maintainability) studies
- platform operation and maintenance concepts
- project management, plan approval and construction supervision

Our services are available as a total package as well as individual modules. A special field of competence is the marine transportation of LNG, LPG, LEG, products and chemicals.

Total labour force: 30
