### Naval Architecture and Engineering Services

SMK Ingenieurbüro GmbH is a specialized design and engineering company focused on naval design. We support our customers with parts of complete structural and outfitting design documents for mega yachts, research vessels, LNG-ferries, Tugs and offshore structures. Complete ship design documents are offered as well and will be provided using an experienced network of further engineering companies.

Our focus comprises the basic and detailed design preparing documents such as:

- Classification Drawings, Workshop Drawings, Workshop Documents
  - FE-calculations
- all based on modern and sophisticated 3D techniques.

### Other Services

Additionally we offer

- EDP consultancy especially within CAD / CAM technology
- Project Management
